BORDERLAND SCIENCES RESEARCH FOUNDATION is a non-profit organization of people who take an active interest in unusual happenings along the Borderland between the visible and invisible worlds.

The investigation of the invisible worlds is important to our evolution and awakening from the ordinary consciousness in which most people "sleep." As Riley Hansard Crabb, Director of BSRF from 1959 to 1985, has pointed out, "The input of the five senses do not give us answers to the problems of life, they only pose more questions."

In the words of the late N. Meade Layne, Founder and Director of BSRF from 1945 to 1959: "BSRA publications are scientific in approach but employ few technical expressions. They deal with significant phenomena which orthodox science cannot or will not investigate. For example - The Fortean falls of objects from the sky, Teleportation, Radiesthesia (Radionics or Psychotronics), PK Effects, Underground Races, Mysterious Disappearances, Occult and Psychic phenomena, Photography of the Invisible, Nature of the Ethers and the problem of the Aeroforms (UFOs)."

BORDERLAND SCIENCES RESEARCH FOUNDATION is now under the Directorship of Thomas Joseph Brown. Tom is the Editor and Publisher of the JOURNAL OF BORDERLAND RESEARCH, the official organ of BSRF. His wife, Alison Davidson, is the Secretary-Treasurer. Eric P. Dollard is the Foundation Vice President. The Director's home at 1103 Bobolink Drive, Vista CA 92083 acts as Headquarters for the Foundation. The Phone Number is (619) 724-2043. Address all correspondence to the PO Box (549).

DONATIONS and bequests toward Foundation research programs and expenses are welcome. Our primary function is to act as a clearing house for hard to find information. We welcome and encourage donations of material for our JOURNAL.

EEMAN SCREENS

Put yourself in a "relaxation circuit" using your own energies for increased well being.

Any arrangement which connects polar opposites of one or of different bodies by means of electrical conductors is referred to as a "relaxation circuit".

Eeman Screens connect the positive and negative poles of the body, promoting muscle relaxation and stimulating body function. They can be used for fostering sleep, recovery from fatigue and disease and for increasing your capacity for work and health.

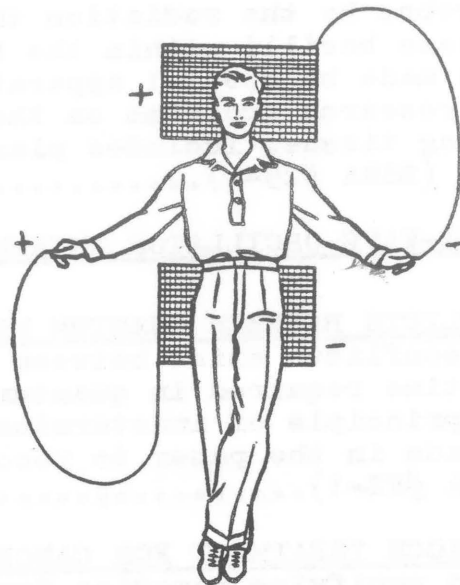

FIG. 1.—One subject in relaxation circuit, showing copper gauze mats and wire connections.

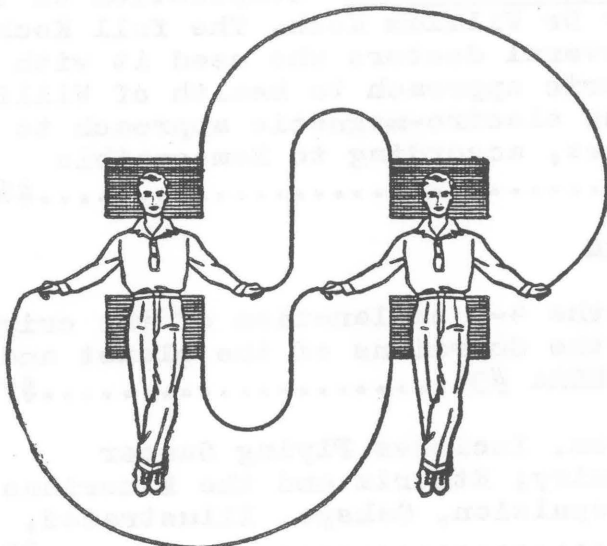

FIG. 3.—Two subjects in closed relaxation circuit. Each subject with left hand (-) to head (+) and right hand (+) to spine (-) of other subject.

The relaxation circuit affects not only organic but also nervous and mental health.

For experiments with one person - the handle in the left hand (-) is connected with a copper gauze screen beneath the head (+), and the right hand (+) is connected with another screen beneath the base of spine (-).

Several people can be connected together through the relaxation circuit. Also research done by healers has shown the effectiveness of linking healer and patient (as shown below).

VITIC

Research project on the physiological effects of Carbon Rod in one hand and an Alnico Magnet in the other. From data assembled by Brian Brown in "Dynamic Power of the Mind", from Nandor Fodor on Reichenbach and Odic Force, and miscellaneous notes by Meade Layne and Yada di Shi'ite on inducing increased vitality or nerve energy in the body, known only to secret priesthods of Egypt and Tibet.

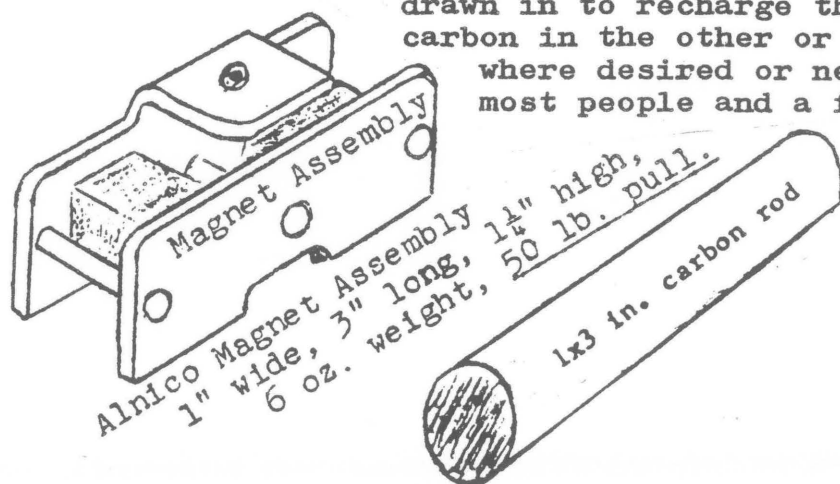

Added information from Count Walewski on Sun (Carbon) rod and Moon (Magnet) rod, with a special arrangement of magnets and rods suggested by Dr Anton Mesmer through a medium in Pomona, California in 1960. Mesmer's diagram calls for 2 powerful Alnico magnets mounted on a wooden frame so they pull toward each other, but far enough apart so one hand can be placed between them grasping an iron or steel rod (it can be copper covered) at the center of the magnetic vortex. On the wooden upright which holds the 2 magnets or magnetic assemblies apart, a one-loop coil of insulated copper wire is mounted, encircling the steel rod protruding from the center of the wooden upright.

This 5-inch diameter coil, ends overlapping but not touching, makes it a pulsing magnetic field created by the Alnico magnet-assemblies pictured here, 50 lbs. pull each. The other hand holds a 1x4 inch carbon rod or bundles of small rods, such as battery carbons.

In our continuing search to find beneficial, invisible forces to upgrade cellular activity, borderland research has led us to the clinical successes of Dr Anton Mesmer, 200 years ago, in Vienna and Paris. Our modern experience in California so verifies that of Mesmer. Animal magnetism can be reinforced with current from an iron or Alnico magnet, especially when carbon is used to complete the circuit. Sun power is drawn in to recharge the system. Magnet in one hand, carbon in the other or placed anywhere on the body where desired or needed. This is a novel idea to most people and a fitting subject of research.

THE CAMERON AURAMETER

The Cameron Aurameter is a fine, precision copper instrument which can be used for scientific experiments in dowsing. With it, you can outline the human aura or locate underground water sources. This instrument will give satisfactory results if used patiently and without prejudice. Remember that you must want it to work, otherwise you will withhold energy from your hand. It is this auric-body energy or magnetic energy which charges the instrument. When it is charged, it will respond to a positive or negative charge on an object or from a person.

The Aurameter is more than a toy and it may open up wonderful and unknown natural laws and forces to you. You yourself may be the discoverer of some of these laws and forces.

You never know until you try!

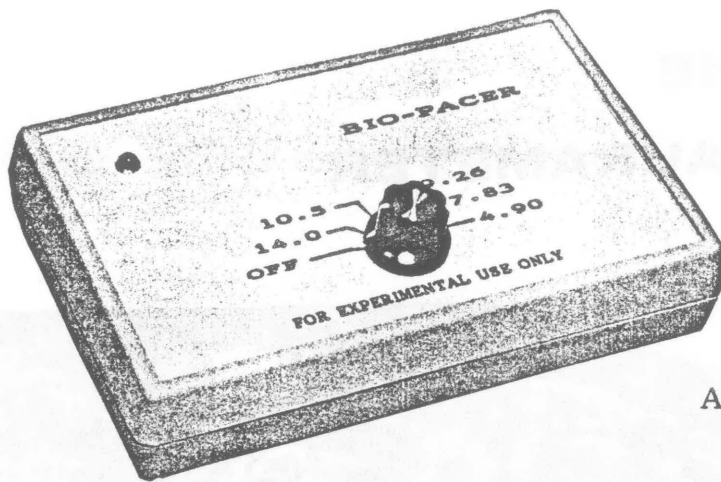

THE CAMERON AURAMETER - Copper Dowsing Instrument (BSRA #15-A)....\$28.00
postpaid

THE CAMERON AURAMETER - Brochure. This book adds another chapter in the art and science of dowsing, or water finding, and the achievements in that field by the late Verne L Cameron. It also describes the out-of-this-world performance of the Aurameter, the metal dowsing instrument invented by him. This instrument serves as an accurate water compass. Chapters include an introduction by Meade Layne, founder and first director of Borderland Sciences Research Foundation; Verne Cameron's own story; Delineation of the Human Aura, The Aurameter and Vitic, nerve energy derived from carbon and magnet; Psychic Investigations, Eeman Circuits; and Locating Underground Water. Illustrations include drawings of the different force-fields, or auras, around men and women, man's higher bodies, fields of force generated by metal cones and a picture of Verne Cameron. Lake Elsinore, California, was brought back to life using wells that Cameron dowsed. Egerton Sykes, editor of the British radiesthesia journal "PENDULUM", nominated Verne Cameron for the title of MASTER OF DOWSING, in 1966. 90 page book.(BSRA #15)..\$8.50

THE BIO-PACER ADVANCED MAGNETIC PULSE GENERATOR

Today, many people have become aware of the subtle stresses generated in our everyday world. From fluorescent lights to TV screens to power lines in the air to ley lines in the ground, the environment is filled with hundreds of little signals that effect our health. If you feel strangely irritated in Department Stores or feel "burned out" flying on jet airplanes, the BIO-PACER may be for you.

THE BIO-PACER

The BIO-PACER is the most advanced ELF Pulse Generator for sale in America today. It is not simply a copy of other units. It is a completely new system that combines simplicity, durability, pulse rate stability, long battery life, and user friendliness in one light weight, low cost package.

Many of the environmental stresses encountered by sensitive people are caused by high voltage (100 volts or higher) or by stray but powerful magnetic fields. The living energy in and around the human body is very sensitive to these irritations. Most ELF devices produce a powerful magnetic spike thereby causing one kind of irritation while helping to reduce the effects of others.

With its advanced antenna system, the BIO-PACER produces "balanced magnetic pulses" that are very gentle on the living energy around the human body. The BIO-PACER produces no irritations while helping the body protect itself from other electromagnetic stresses from the environment.

PULSE REPETITION RATES

The BIO-PACER produces stimulations in the normal brainwave frequency range. Although it does not cause "brainwave entrainment" (no commercial units do) it does promote these subjective effects.

- 4.9 deep relaxation, introspection, meditation, sleep.
- 7.83 'the Earth Resonance' for general use for protection from 'JET-LAG', TV, fluorescent lights, high voltage and stray magnetic fields.
- 9.26 promotes harmony of creative and analytical mind processes, a sense of 'inner balance' and relaxation.
- 10.5 promotes a sense of 'relaxed alertness' for introspection and thought.
- 14.0 promotes a sense of being 'energized', helps focus the analytical mind.

No medical claims are made or implied for use of the BIO-PACER. Since all of the above effects are subjective, the unit is available for experimental use only.

The Journal of Borderland Research

In February, 1945 Meade Layne issued a nine page Journal titled "The ROUND ROBIN." It began with the words, "This is the first -- and, for all we know, may be the last -- issue of this Bulletin. Whether the idea is feasible and worthwhile depends on the reception you give it, and the interest you may take in it in the future." Over 40 years later Meade's Bulletin continues as "The Journal of Borderland Research," the official organ of the Borderland Sciences Research Foundation.

At present our supply of back issues does not go back to 1945, but as time goes on we hope to re-issue the complete set. Riley Hansard Crabb took up the torch from Meade Layne in 1959 and carried on through until 1985 -- 26 years of dedication. In 1985 Riley asked Thomas Brown to carry on the work of the Foundation, a job he readily undertook.

"BIO-ELECTRIC/MAGNETIC IONIC STABILIZER"tm

"You are the salt of the Earth, You are the Kingdom of God. If that salt has lost it's flavor, you ain't got much in your favor..."

The above is much more than words of a song from the Broadway musical or movie "GODSPELL." Sodium chloride (ole-fashion table salt - NaCl) is the finest conductor of electricity through water on our planet. The human body usually contains 65-80% water.

The sodium ionic charge in human systems appears to be the greatest casualty in modern civilized living. The sodium charge is easily knocked out or neutralized by artificial lighting, certain types of music and other sounds, food additives, artificial preservatives & dyes, micro-wave ovens, computer terminals, coffee, excess heat on hot summer days, negative thinking... the list goes on and on. "Psychic Vampires" or "Energy Leeches" often 'zap' the sodium charge from unsuspecting humans - temporarily.

It is essential that the sodium ionic charge operate at optimum frequency within the human frame for the individual to maintain balance/centeredness. This allows the physical body to transmute lithium which is the basic foundation from which all other matter is transmuted in adequate supply.

The BIO-E/M IONIC STABILIZER(tm) contains a combination of four mineral crystals including a lithium compound, which insures the body will retain an optimum charge if kept within three feet of one's aura. Carried in shirt or pants pocket allows excellent results. Use in right or left pocket, or both - for stronger protection. Exposure to direct sunlight for 10 minutes, twice a month, will allow the STABILIZER to function for one's highest and best good - indefinitely.

BIO-E/M IONIC STABILIZERtm (single).....\$8.00pp, (pair).....\$15.00pp
(Californians add 6% tax. Foreign air mail add \$2.00 additional)
